Jabra BT320s Software upgrade - a step-by-step guide

Main features

- Improved connectivity to Jabra A320s
- A2DP reconnect fix for some new models of phones.
- Motorola Q and LG8500 streaming improvements
- Improvement on pairing second device
- Prevent disconnect when suspending A2DP

PLEASE READ CAREFULLY BEFORE PROCEEDING

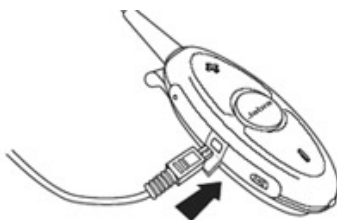

STEP-BY-STEP

We recommend you download and print these instructions for handy reference

Just follow these three easy steps to upgrade your Jabra BT320s

STEP 1

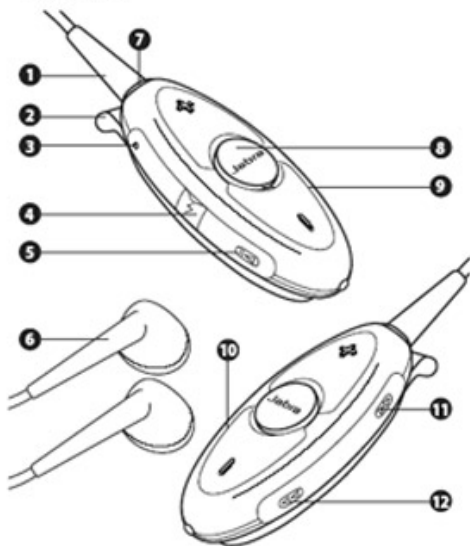

- Connect your BT320s to your PC by inserting the USB cable (included in the box) into the charging socket of the BT320s (see illustration) and insert the USB connector into an USB port on your PC. Make sure your Jabra BT320s is turned off.

Immediately after connection, your Jabra BT320s will start charging which will be indicated by the LED light being solid red. Simultaneously, press both the Play/Pause button (5) and the Skip Track button (11) until the LED light turns solid yellow (see illustration) – the Jabra BT320s is now in upgrade mode. Your PC will now automatically find your Jabra BT320s.

About your Jabra BT320s

- | | |
|---|--|
| 1. Headphone connector (detachable) | 7. Headphone socket (3.5 mm jack) |
| 2. Clothing clip with lanyard loop | 8. Answer/End button |
